Akbank Turkish Equity Fund

Turkish Equity Fund invests in equities of Turkish companies which are listed on Borsa Istanbul (BIST). The managers identify the fund's investment universe based on liquidity, corporate governance and valuation. We believe the Turkish market is under-researched and so offers numerous opportunities to exploit market inefficiencies. The focus of the fund is based on bottom-up stock selection which also takes account of the macro economy and the viability of current sectors trends in portfolio construction. The active top-down / bottom-up investment process used by the team is designed to capture opportunities across all market capitalisations while respecting rigorous risk controls.
